Introduction

- We have all faced the situation where we had to find a doctor of particular department nearby by our area with experience for our family, friends or anyone.
- It would be better if we had some easy measures to find the doctor near our place.
- This is where FIND YOUR DOC comes into play.
- This website lets you know about the doctors nearby your area; We can find the best rated doctors in your locality with a few clicks.

Problem Definition

Design and implement a software system to locate quality doctors belonging to a particular department of medicine in the user's locality.

Related Works

- practo.com is a similar website but they lack their service in our state.
- doctor.webmd.com is also alike with similar features.

Architecture

- The Architecture comprises of Web app, User, Doctor and Database to classify the given data. It gives a view of the entire system highlighting the important features and ignoring unnecessary details.
